

Spray Liaison Registration

If you are a Spray Liaison Officer for a beekeeper association, you can register to use the Bee.Watch App pesticide notification management system free of charge. A User ID and temporary password will be emailed once your details are registered with Bee.Watch.

The system relies on local pesticide users to record their treatments on the Bee.Watch App, all of which are summarised on an interactive map.

The Thames Valley Pesticide Awareness Initiative (TV-PAI) trialled the system in 2018 with local farmers, beekeepers and pest control companies. The Bee.Watch App pesticide notification management system is an accepted notification method for Red Tractor Farm Assurance.

“Red Tractor is aware of Bee.Watch and the communication service offered for users of pesticides. Red Tractor require their Crops and Fresh Produce assured members to give local beekeepers a minimum of 48 hours’ notice of their intention to apply a Plant Protection Product that is hazardous to bees. Red Tractor do not stipulate how farmers must do this and there are different ways in which they can. Red Tractor can confirm that using Bee.Watch would be one such acceptable way a farmer could demonstrate they meet the Red Tractor requirement.” Red Tractor 03.12.2018

The Bee.Watch App: Spray Liaison

Please complete the following contact details and email to lb@uwatch.co.uk.

Spray Liaison

- Name:
- Association Name:
- Address:
- Postcode:
- Email Address:
- Telephone number*:

* A Spray Liaison’s telephone number will only be visible to a registered Bee.Watch App ‘Pesticide User’ or ‘Beekeeper/Swarm Collector’ Users, who choose to become affiliated to a Spray Liaison officer. Please call or e-mail us if you require further information.
